PUROL, DAVID M

ART UNIT	PAPER NUMBER
----------	--------------

3634

DATE MAILED: 04/19/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Art Unit: 3634

1. The preliminary amendment filed on May 10, 2004 has been entered.
2. Applicant's election without traverse of Species I in the reply filed on January 9, 2006 is acknowledged.

Accordingly, claims 8-10 and 17-22 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s).

See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3634

Claims 1-7, 11-16 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over the claims of U.S. Patent No. 6,655,441. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are drawn to a single inventive concept.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2,4,5,7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Virlouvét. Virlouvét discloses a Venetian blind comprising a support 13,14, a spacing cord 37, a spacing adjustment wheel 23, an angle cord 32, an angle adjustment member 19, a drive mechanism 11, a friction coupling 22, a stop device 35.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11,12,14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Virlouvét in view of Dietzsch. Virlouvét discloses the claimed invention absent the venetian blind as being motor driven. Dietzsch discloses a motor driven 6 venetian blind, wherein, to incorporate this teaching into the venetian blind of Virlouvét for the

Art Unit: 3634

purpose of automating the control of the blind would have been obvious to one of ordinary skill in the art.

6. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Virlovvet in view of Dietzsch as applied to claims 11,12,14 above, and further in view of Kuhar '257. While the venetian blind of Virlovvet, as modified by Dietzsch, does not disclose the use of a remote control, Kuhar '257 disclose a venetian blind which utilizes a remote control 130,132,134, wherein, to incorporate this teaching into the venetian blind of Virlovvet, as modified by Dietzsch, for the purpose of controlling the operation of the motor would have been obvious to one of ordinary skill in the art.

7. Any inquiry concerning this communication should be directed to David M. Purol at telephone number (571) 272-6833.
